Job Title: Technology - Software Engineer - Niche 3

Job Description: GT Title:

Nike Developer Experience Engineer

WHO ARE WE LOOKING FOR

We're looking for a seasoned DevOps engineer with the skills to automate repeatable processes, develop integrated solutions, and help deliver a seamless cloud deployment and reporting platform.

The candidate will have demonstrable experience coding and scripting using languages like Python, JavaScript, etc. Understand serverless architectures and continuous integration & deployment (CI/CD), plus GraphQL and RESTful API development. Understand infrastructure-as-code technologies (e.g. Terraform, CloudFormation), source code management (GitHub) as it relates to the developer experience. Build automation skills (Jenkins, GitHub Actions) are also required.

Our preferred candidate is a team-player and a self-starter with a passion for learning and growing. Attention to detail and the ability to communicate with a highly technical audience are desired qualifications.

WHAT YOU BRING

Bachelor's degree in Computer Science or IT related discipline or any combination of equivalent relevant education, training, and experience.

3+ years of development experience using AWS.

5+ years of professional experience as a software engineer.

Comfortable working in a Linux environment.

Proficient in programming using two or more of the following: Python, JavaScript, Shell Scripting, Groovy, Java.

Experience in designing and consuming Rest and GraphQL APIs.

Experience in containerization using Docker.

The following qualifications are preferred:

Experience setting up, maintaining, and automating continuous integration systems.

Strong working knowledge of Containerization with Kubernetes.

Experience with Jenkins and GitHub Actions.

Experience working on a Platform as a Service (PaaS) team.
